Mongoose:

```
async function processAllUsers() {
 // --- 1: ---- -- ----
 // find({})
 const users = await User.find({});
 if (users.length === 0) {
  console.log("
  console.log(` ${users.length} $ = $ (.`);
 // LEE 2: LEESE BESSEL showInfo LE LEE
 // BEES S-forEach SES SESSES SES SESSES
 users.forEach(user => {
  // BEBBB BEBBBB showInfo BB BBBBBB BBBBB BBBBB
  // BEES S-showinfo SES SESSES SESSES SESSES SESSES User
  const userInfoForDisplay = user.showinfo();
  // --- ---- ---- ---- ----
 });
 console.log("
} catch (error) {
 console.error("
 }
// ..... ..... ... ... ....
// processAllUsers(); //
```

```
const displayInfoArray = users.map(user => {
  return user.showinfo(); // ** *********** user.showinfo() ** ******************************
});
console.log("*********************************, displayInfoArray);
```
